Released: March 17, 2008 Vol. 45 No. 2

Agricultural Summary: Most of Colorado received below average amounts of precipitation last week. Overall, snowpack is down 1 percent from the previous week to 126 percent of the State average. Temperatures across the state were at or above average for this time of year. Farmers were allowed 4.1 days in the field for spring operations.

TOP SOIL MOISTURE BY PERCENT								
	Very Short Short Adequate Surplus							
This Week	14	27	50	9				
Last Week	14	26	49	11				
Last Year	1	7	74	18				

SUBSOIL MOISTURE BY PERCENT							
Very Short Short Adequate Surpl							
This Week	11	29	54	6			
Last Week	11	24	56	9			
Last Year	9	15	61	16			

Field Crops: Winter wheat was 8 percent pastured last week, with the crop rated in mostly fair to good condition. Spring barley was 2 percent seeded by week's end, which is behind the 5-year average of 9 percent. Dry onions were 4 percent planted and spring wheat was 1 percent seeded.

SMALL GRAIN CONDITION BY PERCENT							
Week ending March 16, 2008							
Very Poor Fair Good Excellent							
	Poor						
Winter Wheat							
This Week	11	20	38	25	6		
Last Year	1	3	14	42	41		

Pasture and Range: Pasture and range feed conditions were rated mostly fair to poor across the State. The above-average levels of snowpack in the mountains are keeping ranchers hopeful for conditions to improve during the growing season.

Livestock: Forty-two percent of cows have calved since January 1st while 34 percent of the ewes have lambed during the same time frame. Both are 2 percent ahead of the 5-year average. Death losses for cattle were rated at average for the week and sheep were slightly above average. Stored feed supplies are rated at average for this time of year.

PASTURE AND RANGE CONDITION BY PERCENT

Week ending March 16, 2008

	Very Poor	Poor	Fair	Good	Excel- lent
Pasture & Range-2008	7	25	45	23	0
